### Product Description

The ML501 high linearity upconverter or downconverter combines a passive GaAs MESFET mixer with an integrated HBT LO driver in a low-cost lead-free/green/RoHS-compliant SOIC-8 package. WJ's ML501 uses patented techniques to realize +30 dBm Input IP3 with 8 dB conversion loss using an LO drive level of 0 dBm in a downconverting application. The on-chip diplexer in the mixers allows for good matching on the RF and IF ports. The dual-stage LO driver provides a stable input power level into the mixer to allow for consistent performance over a wide range of LO power levels.

Typical applications include frequency up/down conversion, modulation and demodulation for receivers and transmitters used in 2.5G and 3G GSM/CDMA/WCDMA systems in the PCS, or UMTS frequency bands. They can also be used for WiBro/WiLAN/WiMAX infrastructure requiring high linearity frequency conversion.

1. Min / max limits are tested for the mixer in downconverting application with a low-side LO at 0 dBm at 25 °C with RF/IF = 1900/50, 2200/50, and 1900/300 MHz.  
 2. IP3 is measured with Δf = 1 MHz with RFin = 0 dBm / tone.  
 3. LO is injected with 0 dBm.  
 4. This refers to the operating current under LO drive. The current can be reduced by increasing the value of the R2 resistor slightly.

#### Mounting Configuration / Land Pattern

- Ground / thermal vias are critical for the proper performance of this device. Vias should use a .35mm (#80 / .0135") diameter drill and have a final plated thru diameter of .25 mm (.010").
- Add as much copper as possible to inner and outer layers near the part to ensure optimal thermal performance.
- Mounting screws can be added near the part to fasten the board to a heatsink. Ensure that the ground / thermal via region contacts the heatsink.
- All dimensions are in millimeters (inches). Angles are in degrees.
- Do not put solder mask on the backside of the PC board in the region where the board contacts the heatsink.
- RF trace width depends upon the PC board material and construction.
- Use 1 oz. Copper minimum.
