

# SMT POWER INDUCTORS

## Power Beads - PA0135 Series

-  **Height:** 7.1mm Max
-  **Footprint:** 13.0mm x 13.0mm Max
-  **Current Rating:** up to 40A
-  **Inductance Range:** .074µH to 0.9µH

### Electrical Specifications @ 25°C — Operating Temperature -40°C to +130°C

Part Number <sup>5,6</sup>	Inductance @ I <sub>rated</sub> <sup>3</sup> (nH ± 20%)	I <sub>rated</sub> <sup>3</sup> (A <sub>dc</sub> )	DCR (mΩ)		Inductance @ 0A <sub>dc</sub> (nH ± 20%)	Saturation Current <sup>2</sup> (A <sub>dc</sub> )		Heating Current <sup>3</sup> (A)	Trise <sup>4</sup> Factor K0	Core Loss Factor <sup>4</sup>		Connection

\* DCR rating for indicated parts is for both windings tied in series.

### Mechanical

### Schematic

**Series Hookup**

**Parallel Hookup**

**Weight** . . . . . 4.15 grams  
**Tape & Reel** . . . . . 500/reel  
**Dimensions:** Inches  
 mm  
 Unless otherwise specified,  
 all tolerances are ± .010  
 0,25

# SMT POWER INDUCTORS

## Power Beads - PA0135 Series

### Notes from Tables

1. The rated current as listed is either the saturation current or the heating current depending on which value is lower.
2. The saturation current is the current which causes the inductance to drop by 10% at the stated ambient temperatures (-40°C, 25°C, 125°C). This current is determined by placing the component in the specified ambient environment and applying a short duration pulse current (to eliminate self-heating effects) to the component.
3. The heating current is the DC current which causes the temperature of the part to increase by approximately 40°C. This current is determined by mounting the component on a PCB with .25" wide, 2 oz. equivalent copper traces, and applying the current to the device for 30 minutes. In the series hookup mode, the resistance of the interconnection needs to be taken into account when calculating temperature rise.
4. In high volt\*time applications additional heating in the component can occur due to core losses in the inductor which may necessitate derating the current in order to limit the temperature rise of the component. In order to determine the approximate total losses (or temperature rise) for a given application, both copper losses and core losses should be taken into account.
5. Optional Tape & Reel packaging can be ordered by adding a "T" suffix to the part number, (i.e. PA0135.102T).

6. To order RoHS compliant part, add the suffix "NL" to the part number (i.e. PA0135.102 becomes PA0135.102NL and PA0135.102T becomes PA0135.102NLT).

### Estimated Temperature Rise:

$$T_{rise} = \left[ \frac{Coreloss (mW) + DCRLoss (mW)}{K0} \right]^{.833} (°C)$$

$$Coreloss = KI * (F_{sw}(kHz))^{1.6688} * (K2 * dI)^{2.17} (mW)$$

$$DCRLoss = I_{rms}^2 * DCR(m\Omega) (mW)$$

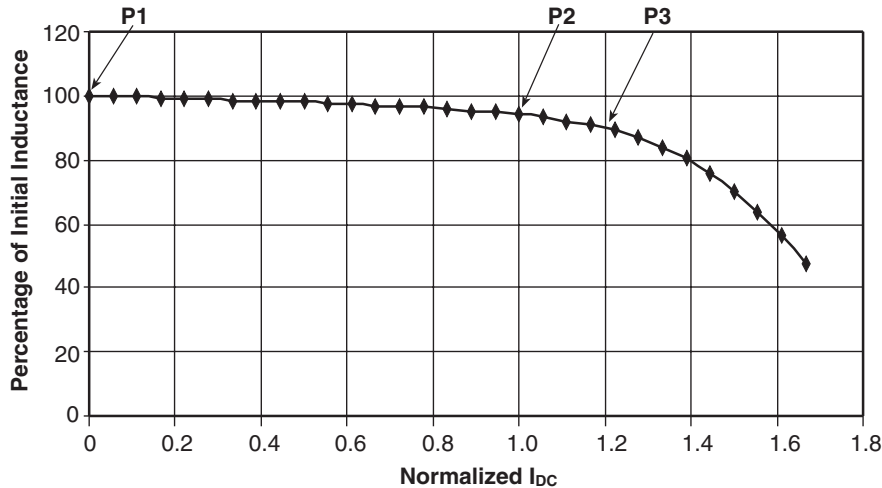

$$I_{rms} = \left[ IDC^2 + \left[ \frac{dI}{12} \right]^2 \right]^{1/2} (Arms)$$

$$F_{sw}(kHz) = \text{switching frequency (kHz)}$$

$$dI = \text{delta I across the component (A)}$$

The temperature of the component (ambient temperature + temperature rise) should be within the listed operating temperature range.

### Inductance vs Current Characteristics

P1 - Initial Inductance, L<sub>0</sub> (.1V<sub>RMS</sub>, 300kHz, 0A<sub>DC</sub>, 25°C)

P2 - Inductance (typically 95% L<sub>0</sub>) at Rated I<sub>DC</sub>.

P3 - Inductance (typically 90% L<sub>0</sub>) at I<sub>PK</sub>.

—◆— Normalized Inductance

Performance warranty of products offered on this data sheet is limited to the parameters specified. Data is subject to change without notice. Other brand and product names mentioned herein may be trademarks or registered trademarks of their respective owners.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
