

GNSS Front-End Module

GENERAL DESCRIPTION

The NJG1159PHH is a front-end module (FEM) designed for GNSS including GPS, GLONASS, BeiDou, and Galileo applications. This FEM offers low noise figure, high linearity, and high out-band rejection characteristics brought by included high performance pre-SAW filter and low noise amplifier (LNA). This FEM can operate from 1.5V to 3.3V single voltage in -40 to 105°C. This FEM has stand-by mode to save current consumption.

This FEM offers very small mounting area by included one SAW filter, only two external components, and very small package HFFP10-HH that is 1.5x1.1mm.

PACKAGE OUTLINE

FEATURES

- Available for GNSS
 - Low supply voltage
 - Low current consumption
 - High gain
 - Low noise figure
 - High out band rejection
 - Small package size
 - RoHS compliant and Halogen Free, MSL1
- 1.8/ 2.8V typ.
 3.0/3.7mA typ. @ $V_{DD}=1.8/ 2.8V$, $V_{CTL}=1.8V$
 0.1 μ A typ. @ $V_{DD}=1.8/ 2.8V$, $V_{CTL}=0V$ (Stand-by mode)
 15.5/16.0dB typ. @ $V_{DD}=1.8/ 2.8V$, $V_{CTL}=1.8V$,
 $f=1575MHz$, 1559 to 1591MHz
 1.55/1.50dB typ. @ $V_{DD}=1.8/ 2.8V$, $V_{CTL}=1.8V$, $f=1575MHz$
 1.70/1.65dB typ. @ $V_{DD}=1.8/ 2.8V$, $V_{CTL}=1.8V$, $f=1597$ to 1606MHz
 1.75/1.70dB typ. @ $V_{DD}=1.8/ 2.8V$, $V_{CTL}=1.8V$, $f=1559$ to 1591MHz
 55dBc typ. @ $f=704$ to 915MHz, relative to 1575MHz
 43dBc typ. @ $f=1710$ to 1980MHz, relative to 1575MHz
 51dBc typ. @ $f=2400$ to 2500MHz, relative to 1575MHz
 HFFP10-HH: 1.5mmx1.1mm (typ.), t=0.5mm (max.)

■ TERMINAL INFORMATION

No.	SYMBOL	DESCRIPTION
1	VDD	Supply voltage terminal. Please connect bypass capacitor C1 with ground as close as possible.
2	VCTL	Control voltage terminal.
3	GND	Ground terminal. This terminal should be connected to the ground plane as close as possible for excellent RF performance.
4	PreIN	RF input terminal. This terminal connects to input of pre-SAW filter.
5	GND	Ground terminal. This terminal should be connected to the ground plane as close as possible for excellent RF performance.
6	PreOUT	Pre-SAW filter output terminal. This terminal connects to LNAIN with L1.
7	LNAIN	RF input terminal. This terminal requires only a matching inductor L1, and does not require DC blocking capacitor because of integrated capacitor.
8	LNAOUT	RF output terminal. This terminal requires no DC blocking capacitor since this terminal has integrated DC blocking capacitor.
9	GND	Ground terminal. This terminal should be connected to the ground plane as close as possible for excellent RF performance.
10	GND	Ground terminal. This terminal should be connected to the ground plane as close as possible for excellent RF performance.

PRECAUTIONS

- Please layout ground pattern under this FEM in order not to couple with RFIN and RFOUT terminal.
- All external parts should be placed as close as possible to the FEM.
- For good RF performance, all GND terminals must be connected to PCB ground plane of substrate, and via-holes for GND should be placed near the FEM.

Cautions on using this product

This product contains Gallium-Arsenide (GaAs) which is a harmful material.

- Do NOT eat or put into mouth.
- Do NOT dispose in fire or break up this product.
- Do NOT chemically make gas or powder with this product.
- To waste this product, please obey the relating law of your country.

[CAUTION]

The specifications on this databook are only given for information, without any guarantee as regards either mistakes or omissions. The application circuits in this databook are described only to show representative usages of the product and not intended for the guarantee or permission of any right including the industrial rights.

This product may be damaged with electric static discharge (ESD) or spike voltage. Please handle with care to avoid these damages.

This product is hollow seal package type, and it is with the structure susceptible to stress from the outside. Therefore, note the following in relation to the contents, after conducting an evaluation, please use.

1. After mounting this product, to implement the potting and transfer molding, please the confirmation of resistance to temperature changes and shrinkage stress involved in the molding.
2. When mounted on the product, collet diameter please use more than 1mmφ. In addition, the value of static load is recommended mounting less than 5N.
3. For dynamic load at the time of mounting, please use it after confirming in consideration of the contact area / speed / load.

Mouser Electronics

Authorized Distributor

Click to View Pricing, Inventory, Delivery & Lifecycle Information:

[NJR:](#)

[NJG1159PHH](#) [NJG1159PHH-TE1](#)

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
