- Ground loop elimination
- Noise isolation of sensitive circuits

DESCRIPTION

Both 10 MBd widebody optocouplers consist of a GaAlAs infrared emitting diode, optically coupled with an integrated photo detector. The detector incorporating an integral Faraday shield provides a high level of noise isolation, required by high power switching applications.

Vishay’s 10 MBd widebody couplers feature a high level of isolation distance, exhibiting an external creepage distance of > 10 mm. This makes these parts ideal for applications with working voltages exceeding 1000 V.
