SHAPES AND DIMENSIONS

RECOMMENDED PC BOARD PATTERNS

Note 1: Pin 2 of the filter provides a DC feed connection to the balanced ports.

In the event that this function is used, pin 2 should be connected to ground using a de-coupling capacitor.

Note 2: In the event that the pin 2 function is not used, the pin should be left unconnected.

EVALUATION SETUP

Note 1: The Port Extension function on the Network Analyser is used to extend the calibration plane to the DUT terminals.

Note 2: Loss in the PCB traces is compensated for by measurement data taken on a PCB Thru' line.

- Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.

- All specifications are subject to change without notice.
