

# Low Power, 3.6 MHz, Low Noise, Rail-to-Rail Output, Operational Amplifiers

## ADA4691-2/ADA4691-4/ADA4692-2/ADA4692-4

### FEATURES

**Low power: 180  $\mu$ A typical**

**Very low input bias currents: 0.5 pA typical**

**Low noise: 16 nV/ $\sqrt{\text{Hz}}$  typical**

**3.6 MHz bandwidth**

**Offset voltage: 500  $\mu$ V typical**

**Low offset voltage drift: 4  $\mu$ V/ $^{\circ}$ C maximum**

**Low distortion: 0.003% THD + N**

**2.7 V to 5 V single supply or  $\pm 1.35$  V to  $\pm 2.5$  V dual supply**

**Available in very small 2 mm  $\times$  2 mm LFCSP packages**

### APPLICATIONS

Photodiode amplifiers

Sensor amplifiers

Portable medical and instrumentation

Portable audio: MP3s, PDAs, and smartphones

Communications

Low-side current sense

ADC drivers

Active filters

Sample-and-hold

### GENERAL DESCRIPTION

The ADA4691-2/ADA4692-2 are dual and the ADA4691-4/ADA4692-4 are the quad rail-to-rail output, single-supply amplifiers featuring low power, wide bandwidth, and low noise. The ADA4691-2 has two independent shutdown pins, allowing further reduction in supply current. The ADA4691-4 is a quad with dual shutdown pins each controlling a pair of amplifiers and is available in the 16-lead LFCSP. The ADA4692-4 is a quad version without shutdown.

These amplifiers are ideal for a wide variety of applications. Audio, filters, photodiode amplifiers, and charge amplifiers, all benefit from this combination of performance and features. Additional applications for these amplifiers include portable consumer audio players with low noise and low distortion that provide high gain and slew rate response over the audio band at low power. Industrial applications with high impedance sensors, such as pyroelectric and IR sensors, benefit from the high impedance and low 0.5 pA input bias, low offset drift, and enough bandwidth and response for low gain applications.

Table 1.

	Micropower	Low Power	Low Power with Shutdown	Standard Op Amp With Shutdown	High Bandwidth
Single	<a href="#">AD8613</a>			<a href="#">AD8591</a>	<a href="#">AD8691</a>
Dual	<a href="#">AD8617</a>	<a href="#">ADA4692-2</a>	<a href="#">ADA4691-2</a>	<a href="#">AD8592</a>	<a href="#">AD8692</a>
Quad	<a href="#">AD8619</a>	<a href="#">ADA4692-4</a>	<a href="#">ADA4691-4</a>	<a href="#">AD8594</a>	<a href="#">AD8694</a>

### Rev. C

Information furnished by Analog Devices is believed to be accurate and reliable. However, no responsibility is assumed by Analog Devices for its use, nor for any infringements of patents or other rights of third parties that may result from its use. Specifications subject to change without notice. No license is granted by implication or otherwise under any patent or patent rights of Analog Devices. Trademarks and registered trademarks are the property of their respective owners.

The ADA4691/ADA4692 family is fully specified over the extended industrial temperature range ( $-40^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$ ). The ADA4691-2 is available in a 10-lead LFCSP and a 9-ball WLCSP. The ADA4692-2 is available in an 8-lead SOIC and 8-lead LFCSP. The ADA4691-4 is available in a 16-lead LFCSP. The ADA4692-4 is available in a 14-lead TSSOP. For pin configurations, see the [Pin Configurations](#) section.

## ABSOLUTE MAXIMUM RATINGS

Table 4.

Parameter	Rating
Supply Voltage	6 V
Input Voltage	$V_{SS} - 0.3 \text{ V}$ to $V_{DD} + 0.3 \text{ V}$
Input Current <sup>1</sup>	$\pm 10 \text{ mA}$
Shutdown Pin Rise/Fall Times	50 $\mu\text{s}$ maximum
Differential Input Voltage <sup>2</sup>	$\pm V_{SY}$
Output Short-Circuit Duration to GND	Indefinite
Temperature	
Storage Temperature Range	-65°C to +150°C
Operating Temperature Range	-40°C to +125°C
Junction Temperature Range	-65°C to +150°C
Lead Temperature (Soldering, 60 sec)	300°C

<sup>1</sup> Input pins have clamp diodes to the supply pins. Limit the input current to 10 mA or less whenever the input signal exceeds the power supply rail by 0.3 V.

<sup>2</sup> Differential input voltage is limited to 5 V or the supply voltage, whichever is less.

Stresses above those listed under Absolute Maximum Ratings may cause permanent damage to the device. This is a stress rating only; functional operation of the device at these or any other conditions above those indicated in the operational section of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

## THERMAL RESISTANCE

$\theta_{JA}$  is specified for the worst-case conditions, that is, a device soldered in a circuit board for surface-mount packages and measured using a standard 4-layer board, unless otherwise specified.

Table 5. Thermal Resistance

Package Type	$\theta_{JA}$	$\theta_{JC}$	Unit
8-Lead SOIC_N (R-8)	120	45	°C/W
8-Lead LFCSP (CP-8-6)	125	40	°C/W
9-Ball WLCSP (CB-9-3)	77	N/A <sup>1</sup>	°C/W
10-Lead LFCSP (CP-10-11)	115	40	°C/W
16-Lead LFCSP (CP-16-22)	75	12	°C/W
14-Lead TSSOP (RU-14)	112	35	°C/W

<sup>1</sup> N/A = not applicable.

## ESD CAUTION

**ESD (electrostatic discharge) sensitive device.** Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

## SHUTDOWN OPERATION

### INPUT PIN CHARACTERISTICS

The ADA4691-2 has a classic CMOS logic inverter input for each shutdown pin, as shown in Figure 56.

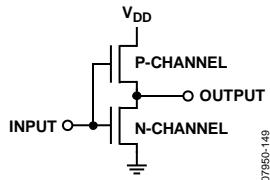

Figure 56. CMOS Inverter

With slowly changing inputs, the top transistor and bottom transistor may be slightly on at the same time, increasing the supply current. This can be avoided by driving the input with a digital logic output having fast rise and fall times. Figure 57 through Figure 59 show the supply current for both sections switching simultaneously with rise times of 1  $\mu$ s, 10  $\mu$ s, and 1 ms. Clearly, the rise and fall times should be faster than 10  $\mu$ s. Using an RC time constant to enable/disable shutdown is not recommended.

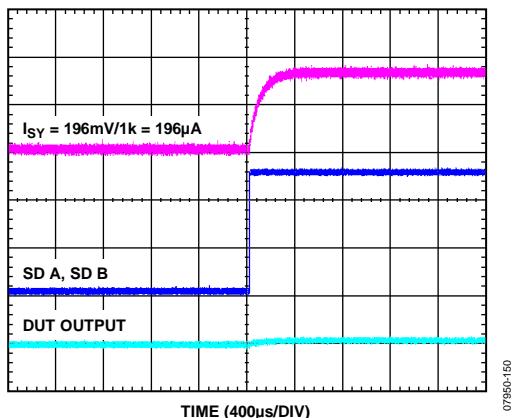

Figure 57. Shutdown Pin Rise Time = 1  $\mu$ s

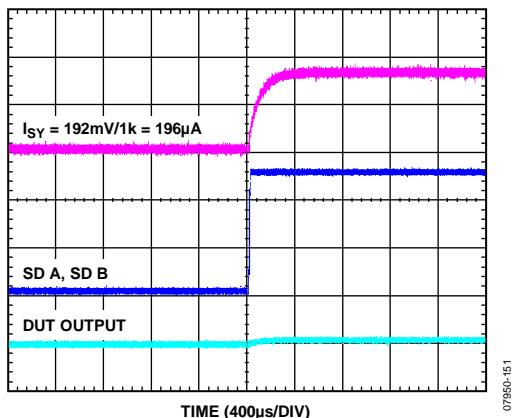

Figure 58. Shutdown Pin Rise Time = 10  $\mu$ s

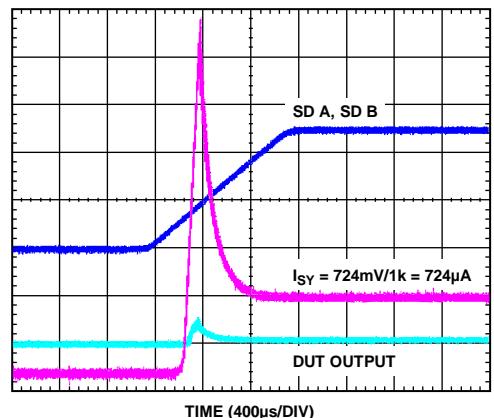

Figure 59. Shutdown Pin Rise Time = 1 ms

### INPUT THRESHOLD

The input threshold is approximately 1.2 V above the V<sub>-</sub> pin when operating on ground and 5 V and 0.9 V when operating on 2.7 V (see Figure 60 and Figure 61). The threshold is relatively stable over temperature. For operation on split supplies, the logic swing may have to be level shifted.

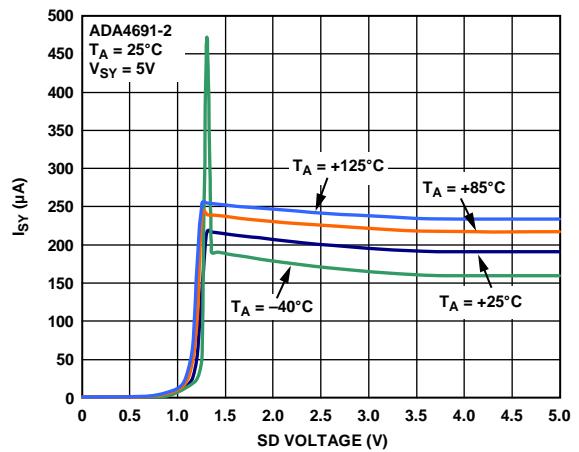

Figure 60. Supply Current vs. Temperature,  $V_{SY} = 5$  V

ООО "ЛайфЭлектроникс"

"LifeElectronics" LLC

ИНН 7805602321 КПП 780501001 Р/С 40702810122510004610 ФАКБ "АБСОЛЮТ БАНК" (ЗАО) в г.Санкт-Петербурге К/С 30101810900000000703 БИК 044030703

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибуторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибуторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помочь разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
