TUSONIX 4400 Series Miniature EMI Filters

These filters are ideal for applications where small size and high performance are critical and a threaded mounting technique is desired.

These C and L configured filters are available in two physical configurations and can be supplied with either unified or metric thread (see page 18 for metric). The small package and large range of electrical characteristics of the 4400 Series make it an effective solution for a variety of microwave applications.

				S	.361 [9.17]	.225 [5.72]	.050 [1.27]

Characteristics

1. Dimensions: Inches [metric]
   Dimensional Tolerance:
   ± .005 [0.13], thread tolerance class 2.
2. Standard finish: Silver
3. Nut material: Brass
   Washer material: Phosphor Bronze
4. When mounting filter without hardware, into tapped hole, the mounting torque applied to the filter body must be no more than 1/2 the torque limits listed on the chart to the left.

PRODUCT INSTALLATION RECOMMENDATIONS

The components in this catalog are manufactured with ceramic dielectrics. To minimize possible damage to the components during installation, the recommendations below should be followed. For information concerning other installation requirements and/or component modifications, consult TUSONIX Customer Engineering at (520) 744-0400.

General Recommendations

Handling: Excessive force or direct impact to the component may result in breakage. Lead bending or cutting, if necessary, should be done with a support for the lead to prevent mechanical stress to the component. Components with required lead modifications are available from TUSONIX.

Lead Soldering: Use a temperature controlled soldering iron with SN60 or SN63 RMA Flux core wire. Maximum soldering temperature to be 500°F(260°C) with a dwell time of 3 seconds maximum. The use of a heat sink between the component body and the solder joint is highly recommended.

Flux Removal: Optimum flux removal can be achieved by vapor degreasing the components immediately after the soldering operation. Total immersion of the components is not recommended.

Solder Mount Recommendations

Mounting: Use a convection or infrared oven and SN60 or SN63 solder paste, or solder preforms, with RMA Flux. The oven profile should slowly heat the entire assembly to a reflow temperature of 430°F (221°C), with a rate of change not to exceed 5°F,3°C/Sec. and a dwell time as short as possible.

Internal Electrode Soldering: Use a temperature controlled soldering iron with SN62 silver bearing (2%) RMA Flux core solder wire. The components should be preheated to 300°F (150°C), then soldered with a maximum temperature of 500°F (260°C) and a dwell of 3 seconds maximum.

Bushing Mount Recommendations

For Mounting Torque, please see standard hardware dimensions table on page 24.

EIA/Tusonix Tolerance Codes

TEMPERATURE CHARACTERISTICS	
EIA Code	Temperature Range
Z5	+10°C to +85°C
Y5	-30°C to +85°C
X5	-55°C to +85°C
X7	-55°C to +125°C
EIA Code	**Maximum Cap. Change**
D	± 3.3%
E	± 4.7%
F	± 7.5%
P	± 10%
R	± 15%

The Components shown in this catalog have been designed and subjected to the following test plan, as is applicable for the individual components. The information shown can be used as a basis for component specifications. For additional information, please consult Customer Engineering at (520) 744-0400.

Filters governed by MIL-PRF-15733 shall be inspected and tested to the requirements of the specification and the applicable specification (slash) sheet.

LOT ACCEPTANCE INSPECTION:		
INSPECTION OR TEST	TEST METHOD PER MIL-STD-202 EXCEPT AS NOTED	POST TEST REQUIREMENTS
Visual and Mechanical		In accordance with applicable requirements
Materials, Design, Construction and Workmanship		
Physical Dimensions & Marking		
Seal (4601 Style Only)	Method 112, condition A	No leaks
Capacitance	Method 305, 1KHz, 1±0.2 VRMS max. +25°C	Within specified tolerance
Dissipation Factor (1/Q)	Method 306, 1KHz, 1±0.2 VRMS max. +25°C	4.0% max
Dielectric Withstanding Voltage	Method 301, 2 seconds, 50 mA max. surge current, 2 times WVDC.	No evidence of damage or break down.
Insulation Resistance	Method 302, 50 mA max. charging current, 100VDC, 2 minutes or as specified by individual variation	Greater than 10,000 Megohms or 100 Ohm-Farads, whichever is less.
Insertion Loss	MIL-STD-220, 50 Ohms, +25°C, no load	Per application requirements.
DC Resistance (4601 Style Only)	MIL-PRF-15733	0.01 Ohms max.
Solderability (5pcs)	Method 208	Per applicable requirements.

PERIODIC QUALITY CONFORMANCE INSPECTION:

A periodic quality conformance inspection program consisting of environmental and reliability testing is in place to ensure that product integrity is consistently maintained.

TUSONIX on-line www.tusonix.com

The TUSONIX Web site provides visitors with a wide range of product and ordering information. At **www.tusonix.com,** customers can view product information and download catalogs in Adobe Acrobat® .pdf format. Customers can also view or link to Sales Offices, International Agents and Distributors. An on-line request form allows customers to immediately specify product requirements and request product information.

LifeElectronics
Живое партнерство

ООО «ЛайфЭлектроникс» **“LifeElectronics” LLC**

ИНН 7805602321 КПП 780501001 Р/С 40702810122510004610 ФАКБ "АБСОЛЮТ БАНК" (ЗАО) в г.Санкт-Петербурге К/С 30101810900000000703 БИК 044030703

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- *Конкурентоспособные цены и скидки постоянным клиентам.*
- *Специальные условия для постоянных клиентов.*
- *Подбор аналогов.*
- *Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.*

- *Приемлемые сроки поставки, возможна ускоренная поставка.*
- *Доставку товара в любую точку России и стран СНГ.*
- *Комплексную поставку.*
- *Работу по проектам и поставку образцов.*
- *Формирование склада под заказчика.*

- *Сертификаты соответствия на поставляемую продукцию (по желанию клиента).*
- *Тестирование поставляемой продукции.*
- *Поставку компонентов, требующих военную и космическую приемку.*
- *Входной контроль качества.*
- *Наличие сертификата ISO.*

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- *Регистрацию проекта у производителя компонентов.*
- *Техническую поддержку проекта.*
- *Защиту от снятия компонента с производства.*
- *Оценку стоимости проекта по компонентам.*
- *Изготовление тестовой платы монтаж и пусконаладочные работы.*
