

## 25/35 Watts

- AC Input LED Driver
- Constant Voltage/Constant Current Operation
- Constant Current Dimming Versions
- High Efficiency
- Water Proof to IP67
- Class 2
- 3 Year Warranty

**Dimensions:**

**DLE25/35:**

4.33 x 2.89 x 1.30" (110.0 x 73.5 x 33.0 mm)

The DLE series of AC input LED drivers incorporate universal input with active power factor correction in a two power stage design, eliminating flicker while providing a high efficiency solution. Designed as a class II isolation product, without the need for a safety earth, DLE series LED drivers are also approved as a class 2 limited power source, making them suitable for a wide range of applications. Dimmable constant current versions are available with the facility for PWM, voltage and resistance programming.

### Models & Ratings - Constant Voltage / Constant Current Models

| Output Power | Output Voltage | Output Current | Output Voltage Range in Constant Current Mode | OVP Range    | Efficiency <sup>(1)</sup> | Model Number |
|--------------|----------------|----------------|---|--------------|---------------------------|--------------|
| 25 W         | 12 V           | 2100 mA        | 9 - 12 V                                      | 13.8-16.20 V | 79.0%                     | DLE25PS12    |
| 25 W         | 24 V           | 1050 mA        | 12 - 24 V                                     | 27.6-32.40 V | 80.0%                     | DLE25PS24    |
| 25 W         | 36 V           | 700 mA         | 24 - 36 V                                     | 41.4-48.60 V | 80.0%                     | DLE25PS36    |
| 24 W         | 48 V           | 500 mA         | 33 - 48 V                                     | 55.2-64.80 V | 80.0%                     | DLE25PS48    |
| 20 W         | 57 V           | 350 mA         | 40 - 57 V                                     | 65.5-76.95 V | 78.0%                     | DLE25PS57    |
| 30 W         | 12 V           | 2500 mA        | 9 - 12 V                                      | 13.8-16.20 V | 80.0%                     | DLE35PS12    |
| 34 W         | 24 V           | 1400 mA        | 12 - 24 V                                     | 27.6-32.40 V | 81.0%                     | DLE35PS24    |
| 36 W         | 36 V           | 1000 mA        | 24 - 36 V                                     | 41.4-48.60 V | 82.0%                     | DLE35PS36    |
| 34 W         | 48 V           | 700 mA         | 33 - 48 V                                     | 55.2-64.80 V | 83.0%                     | DLE35PS48    |
| 28 W         | 57 V           | 500 mA         | 40 - 57 V                                     | 65.5-76.95 V | 82.0%                     | DLE35PS57    |

### Models & Ratings - Dimmable Models

| Output Power | Output Voltage | Output Current | Output Voltage Range in Constant Current Mode | OVP Range    | Efficiency <sup>(1)</sup> | Model Number   |
|--------------|----------------|----------------|---|--------------|---------------------------|----------------|
| 25 W         | 12 V           | 2100 mA        | 9 - 12 V                                      | 13.8-16.20 V | 79.0%                     | DLE25PS2100-AD |
| 25 W         | 24 V           | 1050 mA        | 12 - 24 V                                     | 27.6-32.40 V | 80.0%                     | DLE25PS1050-AD |
| 25 W         | 36 V           | 700 mA         | 24 - 36 V                                     | 41.4-48.60 V | 80.0%                     | DLE25PS700-AD  |
| 24 W         | 48 V           | 500 mA         | 33 - 48 V                                     | 55.2-64.80 V | 80.0%                     | DLE25PS500-AD  |
| 20 W         | 57 V           | 350 mA         | 40 - 57 V                                     | 65.5-76.95 V | 78.0%                     | DLE25PS350-AD  |
| 30 W         | 12 V           | 2500 mA        | 9 - 12 V                                      | 13.8-16.20 V | 80.0%                     | DLE35PS2500-AD |
| 34 W         | 24 V           | 1400 mA        | 12 - 24 V                                     | 27.6-32.40 V | 81.0%                     | DLE35PS1400-AD |
| 36 W         | 36 V           | 1000 mA        | 24 - 36 V                                     | 41.4-48.60 V | 82.0%                     | DLE35PS1000-AD |
| 34 W         | 48 V           | 700 mA         | 33 - 48 V                                     | 55.2-64.80 V | 83.0%                     | DLE35PS700-AD  |
| 28 W         | 57 V           | 500 mA         | 40 - 57 V                                     | 65.5-76.95 V | 82.0%                     | DLE35PS500-AD  |

### Notes

1. Typical efficiency at full load and 230 VAC input.

### Input

| Characteristic            | Minimum                                   | Typical | Maximum | Units | Notes & Conditions             |
|---------------------------|---|---------|---------|-------|--------------------------------|
| Input Voltage - Operating | 90  |         | 305     | VAC   | See derating curve             |
| Input Frequency           | 47  |         | 63      | Hz    |                                |
| Power Factor              |   | >0.9    |         |       | Measured at 230 VAC, full load |
| Input Current             |   | 0.6     |         | A     | 115 VAC                        |
|                           |   | 0.3     |         |       | 230 VAC                        |
| Inrush Current            |   |         | 45      | A     | 230 VAC cold start, +25 °C     |
| Input Protection          | Internal T1.0 A/250 V fuse fitted in line |         |         |       |                                |

### Output

| Characteristic             | Minimum | Typical | Maximum     | Units    | Notes & Conditions   |
|----------------------------|---------|---------|-------------|----------|--|
| Output Voltage             | 12      |         | 57          | VDC      | See models and ratings table   |
| Minimum Load               |         |         |             |          | No minimum load required   |
| Start Up Delay             |         |         | 2.0         | s        | Measured at 115 VAC  |
| Hold Up Time               | 20      |         |             | ms       |  |

|   |              | Int: 100%, 8.4 ms    | A        |                          |

### Safety Approvals

| Safety Agency | Safety Standard                                   | Notes & Conditions          |
|---------------|---|-----------------------------|
| CB            | IEC60950-1:2005                                   | Information Technology      |
| UL            | UL8750  | Approved as Class 2 product |
| TUV           | EN61347   |                             |
| CE            | CE Mark   |                             |
| IEC           | IEC61347-2-13 used in conjunction with IEC61347-1 |                             |
| IP            | IEC60529  |                             |

### Mechanical Details - Constant Voltage / Constant Current

### Mechanical Details - Dimmable Version

#### Notes

1. Dimensions shown in inches (mm).  
 2. Weight: 0.77 lb (350 g).

3. Tolerance: 0.X = ±0.008 (±0.2)  
 0.XX = ±0.002 (±0.05)

## Output Current Adjustment by Variable Resistor

Connect a variable resistor between Dim+ and Dim-.

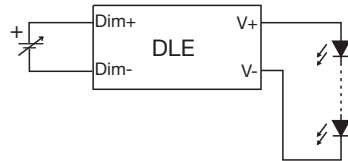

The Dimmed output current can be determined using the equation:

$$\text{Dimmed Current} = \frac{\text{Maximum Current} \times R}{100 \text{ k}}$$

Where the value of R is between 10 kΩ and 100 kΩ. The corresponding range of output current is 10% to 100%

## Output Current Adjustment by DC Voltage

Connect a variable voltage between Dim+ and Dim-.

The dimmed output current is given by:

$$\text{Dimmed Current} = \frac{\text{Maximum Current} \times V}{10 \text{ k}}$$

Where V is the value of control voltage in the range of 1.0 V to 10.0 VDC. The corresponding range of output current is 10% to 100%.

## Output Current Adjustment by PWM

A Pulse Width Modulated (PWM) signal with duty cycle DPWM can be applied between Dim+ and Dim-.

The dimmed output current is given by:

$$\text{Dimmed Current} = \text{Maximum Current} \times \text{DP}_{\text{PWM}} \%$$

Where DP<sub>PWM</sub> is the % of PWM duty cycle between 10% and 100%. The corresponding range of output current is 10% to 100%. PWM frequency should be in the range 0.5 kHz to 5 kHz

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
