

### FEATURES

- 400 mV  $\pm$  1.5% threshold**
- Supply range: 1.7 V to 5.5 V**
- Low quiescent current: 6.5  $\mu$ A typical**
- Input range includes ground**
- Internal hysteresis: 8.9 mV typical**
- Low input bias current:  $\pm$ 10 nA maximum**
- Open-drain outputs**
- Supports wire-AND connections**
- Input polarities: one inverting and one noninverting**
- Low profile (1 mm) TSOT package**
- Drop-in replacement for the LT6700-1**

### APPLICATIONS

- Li-Ion monitoring**
- Portable applications**
- Hand-held instruments**
- Window comparators**
- LED/relay driving**
- Optoisolator driving**
- Control systems**

### GENERAL DESCRIPTION

The ADCMP670 consists of two low power, high accuracy, comparator and reference circuits in a 6-lead TSOT package. The internal 400 mV reference provides the ability to monitor low voltage supplies. The device operates on a supply voltage from 1.7 V to 5.5 V and draws only 6.5  $\mu$ A typical, making it suitable for low power system monitoring and portable applications. Hysteresis is included in the comparators. The comparator outputs are open-drain and the output can be pulled up to any voltage up to 5.5 V. The output stage is guaranteed to sink greater than 5 mA over temperature.

The ADCMP670 is currently available in one model, the ADCMP670-1. This model has one inverting input and one noninverting input, making it suitable for use as a window comparator. The device is suitable for portable, commercial, industrial, and automotive applications.

## ABSOLUTE MAXIMUM RATINGS

Table 5.

Parameter	Range
V <sub>DD</sub>	−0.3 V to +6 V
+INA, −INB	−0.3 V to +6 V
OUTA, OUTB	−0.3 V to +6 V
Output Short Circuit Duration <sup>1</sup>	Indefinite
Input Current	−10 mA
Operating Temperature Range	−40°C to +125°C
Storage Temperature Range	−65°C to +150°C
Lead Temperature	
Soldering (10 sec)	300°C
Vapor Phase (60 sec)	215°C
Infrared (15 sec)	220°C

<sup>1</sup> When the output is shorted indefinitely, the use of a heat sink may be required to keep the junction temperature within the absolute maximum ratings.

Stresses above those listed under Absolute Maximum Ratings may cause permanent damage to the device. This is a stress rating only; functional operation of the device at these or any other conditions above those indicated in the operational section of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

## THERMAL RESISTANCE

$\theta_{JA}$  is specified for the worst-case conditions, that is, a device soldered in a circuit board for surface-mount packages.

Table 6. Thermal Resistance

Package Type	$\theta_{JA}$	Unit
6-Lead TSOT	200	°C/W

## ESD CAUTION

**ESD (electrostatic discharge) sensitive device.** Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

## PIN CONFIGURATION AND FUNCTION DESCRIPTIONS

Figure 3. Pin Configuration

Table 7. Pin Function Descriptions

Pin No.	Mnemonic	Description
1	OUTA	Open-Drain Output for Comparator A.
2	GND	Ground.
3	+INA	Monitors analog input voltage on Comparator A. Connected to noninverting input. The other input of Comparator A is connected to a 400 mV reference.
4	-INB	Monitors analog input voltage on Comparator B. Connected to inverting input. The other input of Comparator B is connected to a 400 mV reference.
5	V <sub>DD</sub>	Power Supply Pin.
6	OUTB	Open-Drain Output for Comparator B.

## APPLICATION INFORMATION

The ADCMP670 is a dual low power comparator with a built-in 400 mV reference that operates from 1.7 V to 5.5 V. The comparator is 1.5% accurate with a built-in hysteresis of 8.9 mV. The outputs are open-drain, capable of sinking 40 mA.

### COMPARATORS AND INTERNAL REFERENCE

Each comparator has one input available externally.

Comparator A has a noninverting input and Comparator B has an inverting input available. The other comparator inputs are connected internally to the 400 mV reference. The rising input threshold voltage of the comparators is designed to be equal to that of the reference.

### POWER SUPPLY

The ADCMP670 is designed to operate from 1.7 V to 5.5 V. A 0.1  $\mu$ F decoupling capacitor is recommended between  $V_{DD}$  and GND.

### INPUTS

The comparator inputs are limited to the maximum  $V_{DD}$  voltage range. The voltage on these inputs can be above  $V_{DD}$  but never above the maximum allowed  $V_{DD}$  voltage. When adding a resistor string to the input, care must be taken when choosing resistor values. This is due to the fact that the input bias current will be in parallel with the bottom resistor of the string. This bottom resistor must therefore be chosen first to control the error introduced by this bias current.

### OUTPUTS

The comparator outputs are open-drain and are also limited to the maximum specified  $V_{DD}$  voltage range, regardless of the  $V_{DD}$  voltage. These outputs are capable of sinking up to 40 mA. Outputs can be tied together to provide a window comparator with a single output.

### ADDING HYSTERESIS

To prevent oscillations at the output caused by noise or slowly moving signals passing the switching threshold, each comparator has built-in hysteresis of approximately 8.9 mV. Positive feedback can be used to increase hysteresis to the noninverting comparator.

**NOTES**

**NOTES**

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
