
## FM Series

The compact FM Series foot switches are appropriate for light or medium duty and medical applications. With a wide range of options, this series offers a greater amount of flexibility, for a reasonable price.

*Application* ..... *4*
*FM1* ..... *5*
*FM1 ... U* ..... *6*
*FM2* ..... *7*
*FM3* ..... *8*
*FM3-Ergonomic* ..... *9*

## PCFS-3M Series

Altech's new low cost foot switch is ideal for any light to medium duty application. The PCFS-3M has an electrical rating of 10A/1/2HP/125V AC, it can serve as a foot operated on/off switch for a wide range of motor driven and electrical devices.

*Application* ..... *10*
*PCFS-3M / PCFS-3MU*
*(with and without guard)* ..... *11*

## FK Series

The medium compact FK Series foot switches are ideal for light or medium duty applications, where there is no demand for high protection levels. It is a foot switch for low cost needs with a larger pedal than the FM Series.

*Application* ..... *12*
*FK1* ..... *13*

## FL Series

The light medium size FL Series foot switches are used where heavy duty applications in hazardous environments require a corrosion-resistant, control device.

*Application* ..... *14*
*FL1* ..... *15*
*FL1 ... U* ..... *16*

## FS Series

The heavy duty medium size FS Series foot switches are suitable for industrial and medical applications. A special safety switch is included with this line.

*Application* ..... *18*
*FS1* ..... *19*
*FS1 ... U* ..... *20*
*FS2* ..... *21*
*FS2 ... U* ..... *22*
*FS3* ..... *23*
*FS3 ... U* ..... *24*

## Custom Designs

Altech Corp can design and manufacture a foot switch to meet needs.

# FM SERIES

The FM series foot switches are ideal for light or medium duty applications and especially medical applications. The compact, sturdy but small, ABS housing is designed to meet all the different contact and switch insert configurations.

This series has many features, such as maintained and two stage momentary contacts, two different colors, and two protection levels. It also offers a variety of flexibility and alternatives already in the standard versions. The wide range of options include:

- Protection levels IP 68 (Medical versions IEC 601-1 certified)
- Especially designed gold plated contacts for low current
- High current switch inserts
- Different cable entries/strain reliefs
- Other cable versions, with shield
- Custom colors for the guard, custom connectors.

The standard and optional features together provide various application possibilities:

Foot switches are typically used when hands-free operation is required or when the hands are needed to perform a separate task while the machine or device must be started or stopped,
or the machine requires manipulation in other ways. Application examples would be:

- Conveyor belt in supermarket
- Sewing machine in textile factory
- Control of dentistry tools
- Operation of logical or digital signals

**⚠ Warning**

Please see page 25 in reference to the warning that applies to every application.

# FM1

• Compact, one pedal foot switch

## Standard Features

- Housing: Gray or black ABS body and pedal cover
- Protection Level: IP 43 and IP 65
- Switch Insert: Snap action microswitch, UL/CSA approved
  - Electrical Rating: 5A/125-250V AC (If used with appropriate cable, see cable chart on page 29)
  - Contact Types: Momentary, maintained, or two stage momentary
  - Circuit: SPDT-SB, DPDT-SB, 2x SPDT-SB
- Strain Relief: Vinyl sleeve
- Cable: - Multi conductor, PVC, SJT, 2 m (6 ft. - 6 in.)
  - Without Cable
- Temperature Range: -20°C up to +80°C (-4°F up to +176°F)

RWTÜV Certified EN 60601-1 IEC 60601-1 (UL2601-1 recognized) DIN VDE IEC CE

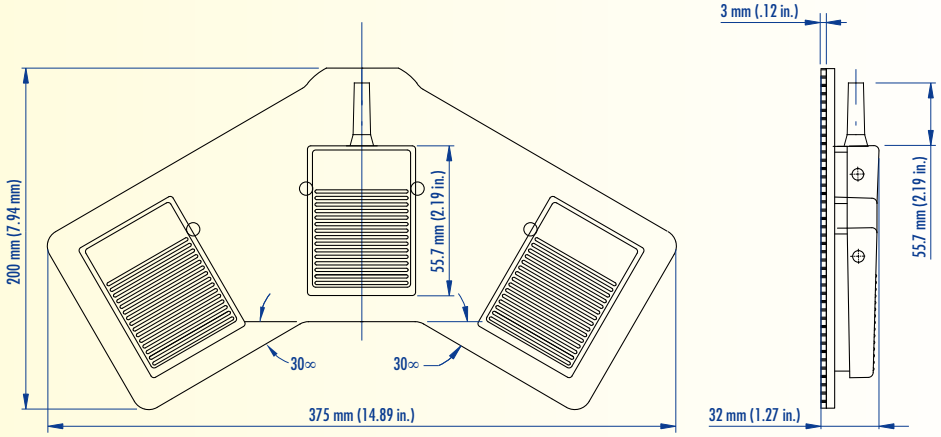
☐ B Black housing/cable

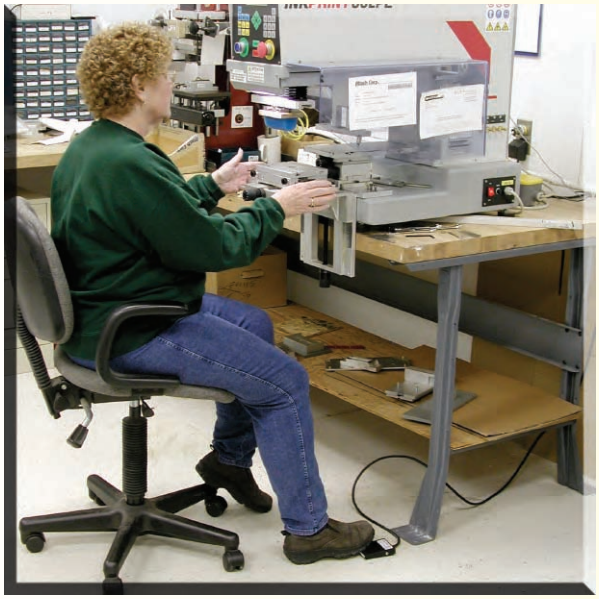
### Options

- Protection Level: - IP 67
- Switch Insert: - Gold plated contacts for low current applications
  - Electrical Rating: 0.1A/125V AC
  - Silver-Nickel plated contacts
  - Electrical Rating: 10.1A (1/4HP)/125-250V AC
- Strain Relief: - Standard straight-through (IP 68)
  - Bend protection (IP 68)
  - Trumpet Pull/Bend protection (IP 68)
- Cable: - Shielded cable
  - Per customer specifications
- Connectors: - Per customer specifications
- IEC 60601-1 certified and UL 2601-1 recognized
- Different switch inserts for each pedal

### Dimensions



# PCFS-3M SERIES



Altech's new low cost foot switch is ideal for any light to medium duty application. The PCFS-3M has an electrical rating of 10A (1/2HP)/125V AC, it can serve as a foot operated on/off switch for a wide range of motor driven and electrical devices.

### Characteristics:

The virtually indestructible steel housing meets even more challenging demands of every day applications. The steel guard comes standard in red or orange and provides an affordable "safeguarding" of the foot switch. The guard is interchangeable with the FM1 series foot switch which makes this configuration a perfect fit for more cost sensitive applications.

### Application Examples:

- Operation of logic signals
- Coil winding machines
- Photo lab equipment
- Sewing machines
- Packaging equipment
- Conveyor belts
- Imprinting equipment
- CNC machines

### ⚠ Warning

Please see page 25 in reference to the warning that applies to every application.

# PCFS-3M

- Compact, one pedal foot switch with and without guard

## Standard Features

- Housing: Black steel body and pedal cover
- Guard: Modern design with high quality steel construction and rubber mat, color: bright red or orange
- Protection Level: IP 20
- Switch Insert: Snap action microswitch, UL/CSA approved
  Electrical Rating: 10A (1/2HP)/125V AC (If used with appropriate cable, see cable chart on page 29)
  Contact Types: Momentary
  Circuit: SPDT-SB or 1n.o.
- Strain Relief: Built-in
- Cable: - Without Cable
  - Multi conductor, SJOOW
- Temperature Range: -20°C up to +80°C (-4°F up to +176°F)

51.001B

51.051OR

51.051R

# FK SERIES

The FK series foot switches are suitable for light and medium duty applications. The medium size, sturdy ABS housing fits up to 3 snap action microswitches rated up to 10A (1/2HP)/250V AC. The momentary and two stage momentary contact types cover almost every demand.

With the optional strain reliefs, cables and connectors and the larger pedal, the FK series is a low cost alternative, where no high protection levels are required. This series covers the range between the FM series and the FS series. This foot switch will fit numerous applications,
including the following:

- Medical equipment
  (tablet sorter, labeling machines etc.)
- Dictation machines
- Photo laboratory equipment
- Medium industrial machines
  (storage and retrieval systems,
  sewing and textile machines, etc.)

**⚠ Warning**

Please see page 25 in reference to the warning that applies to every application.

# FK1

• Medium size, one pedal foot switch

### Standard Features

- Housing: Gray or black ABS body and pedal cover
- Protection Level: IP 43
- Switch Insert: Snap action microswitch, UL/CSA approved
  - Electrical Rating: 10A (1/2HP)/125-250V AC (If used with appropriate cable, see cable chart on page 29)
  - Contact Types: Momentary, two stage momentary
  - Circuit: SPDT-SB, DPDT-SB, 2x SPDT-SB
- Strain Relief: Vinyl sleeve
- Cable:
  - Multi conductor, PVC, SJT, 2 m (6 ft. - 6 in.)
  - Without Cable
- Temperature Range: -20°C up to +80°C (-4°F up to +176°F)

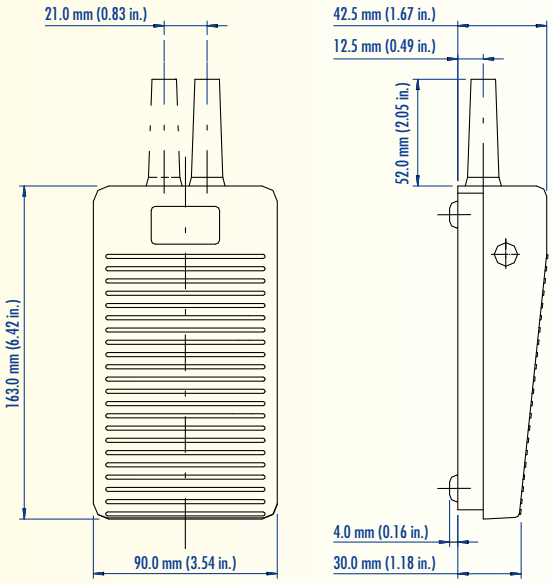
### Options

- 3 Switch Inserts available upon request
- Strain Relief:
  - Second vinyl sleeve
  - Standard straight-through (IP 68)
  - Bend protection (IP 68)
  - Trumpet Pull/Bend Protection (IP 68)
- Cable:
  - Shielded cable
  - Per customer specifications
- Connectors: - Per customer specifications
- Foot Guard also available

### Dimensions



# FL SERIES

The FL series foot switches are appropriate for heavy duty applications in hazardous and demanding environments. The foot switch with the Polyamide 6.6 housing shows the same sturdy body as the FS series, but with the advantage of resistance against water, oil, and certain acids and chemicals, which enables a longer life expectancy. The foot guard consists of die cast aluminum, to sustain all safety requirements.

The FL series offers considerable flexibility with the combination of slow make-break and snap action switch inserts, with the contact types momentary, maintained and two stage momentary and the choice of different potentiometer values. Human safety and machine protection can be provided by adding of Anti-Trip lever and foot guard. These items prevent the foot switch from accidentally actuating the machine function. Different strain reliefs, cables, connectors and custom colors are also available.

The main applications of this non-corrosive foot switch are “wet” industrial environments, drilling processes, and in the food industry, where the environment has to be cleaned regularly with cleaning detergent.

**⚠ Warning**

Please see page 25 in reference to the warning that applies to every application.

# FL1

- Light medium size, one pedal foot switch

## Standard Features

- Housing: Polyamide 6.6 body, cover and pedal
  - Colors: Gray body, red cover and black pedal
  - Anti-Trip: Die cast aluminum pedal and lever in gray (available on some models)
- Protection Level: IP 65
- Switch Insert: Snap action or slow make-break
  - Silver alloy contact material
  - Electrical Rating: 10A/500V AC (If used with appropriate cable, see cable chart on page 29)
  - Contact Types: Momentary, maintained, or two stage momentary
  - Circuit: SPDT-SB; DPDT-DB; 10k Ohm, 2.0W Potentiometer with SPDT-SB microswitch
- Cable Entry: Threaded hole (M20)
- Temperature Range: -30°C up to +80°C (-22°F up to +176°F)

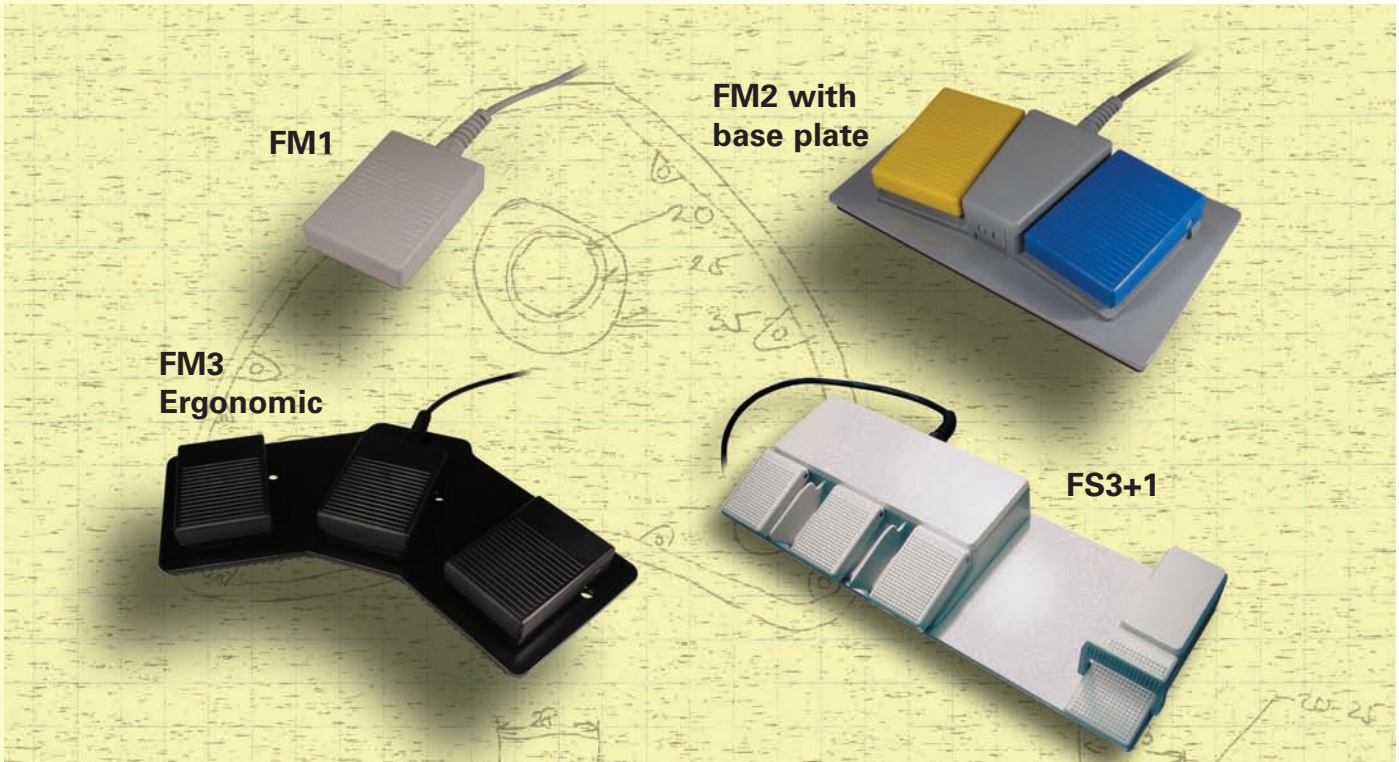
# Altech Custom Designs

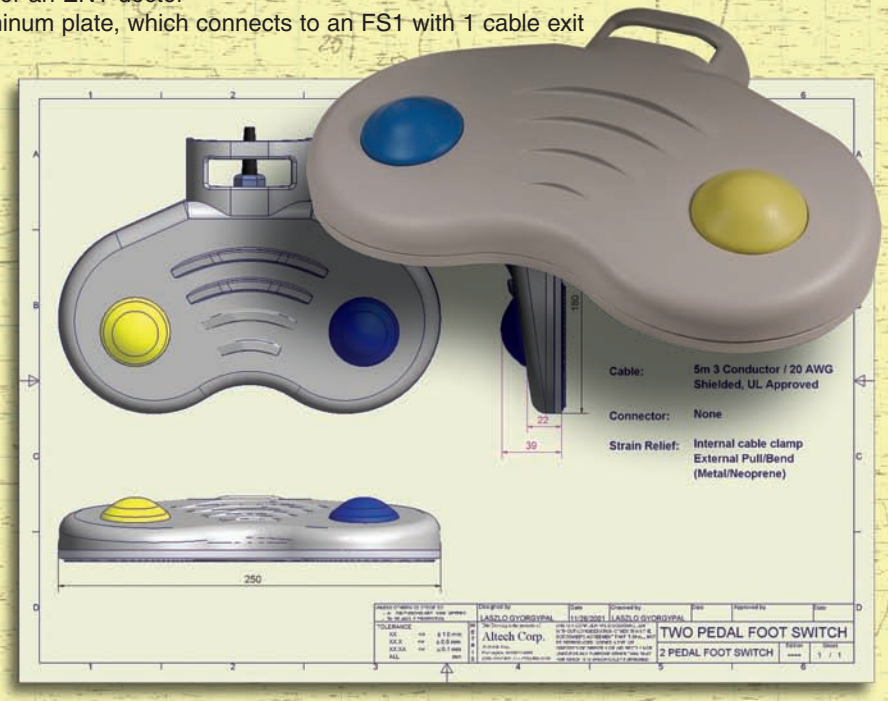


Foot switches for medical applications require unique designs for safety, reliability and hygiene. Almost every foot switch is a custom product. Altech is a leader in designing these medical foot switches that combine the unique requirements needed for these demanding applications. Altech's design department has designed foot switches to meet a doctor's preferences such as an actuation force from 0.5 lbs. to 50 lbs. Sometimes it is as simple as a cable length change, a totally different cable, or a special connector. Here are some of the existing designs:

- FM1 was molded using a special white ABS material
- FM2 required an aluminum base plate with blue and yellow pedal covers
- FM3 is ergonomically designed for an ENT doctor
- FS3+1 was mounted on an aluminum plate, which connects to an FS1 with 1 cable exit

The foot switch on the right shows an innovative concept created by our design department. This takes the foot switch to a totally different level incorporating new ideas and blending them into modern equipment designs.

Altech Corp can design and manufacture a foot switch to meet needs. Give us an opportunity to quote on your requirements!



# FS SERIES

The heavy duty, medium size FS series foot switches are primarily used in industrial and medical applications. Due to the sturdy design of the die cast aluminum housing, the foot switch is an exceptional value for strict environments. This compact design offers a lot of versatility:

- Every combination of slow make-break and snap action switch inserts with momentary, maintained and two stage momentary contact types are possible. Different potentiometer values are also available.
- Additional safety features like a foot guard, Anti-Trip lever and especially two safety foot switch versions complete this line.
- The optional medical versions and explosion protected foot switches meet the requirements of either IEC 601-1 or EEX d ||C T6, and come with appropriate strain relief and 3 meter (10 ft.) cable.
- The foot switch can be customized with a wide range of options, including cables, connectors, colors, and foot rests.

The typical industrial applications include:

- ironing machines
- construction machinery
- sand blasting machines
- bending machines
- machine tools
- medical equipment

**⚠ Warning**

Please see page 25 in reference to the warning that applies to every application.

# FS1

• Heavy duty medium size, one pedal foot switch

### Standard Features

- Housing: Die cast aluminum body and cover with Polyamide 6.6 pedal
  - Colors: Gray body, red cover and black pedal
  - Anti-Trip: Die cast aluminum pedal and lever in gray (available on some models)
- Protection Level: IP 65
- Switch Insert: Snap action or slow make-break Silver alloy contact material
  - Electrical Rating: 10A/500V AC (If used with appropriate cable, see cable chart on page 29)
  - Contact Types: Momentary, maintained, or two stage momentary
  - Circuit: SPDT-DB; DPDT-DB; 10k Ohm, 2.0W Potentiometer with SPDT-SB microswitch
- Cable Entry: Threaded hole (M20)
- Temperature Range: -30°C up to +80°C (-22°F up to +176°F)

R Gray body, red cover and black (Anti-Trip: gray) pedal

### Options

- Protection Level: - Ex - Explosion protected
- Switch Insert: - Gold plated contacts for low current applications
  Electrical Rating: Max. Power Consumption: 12.5mW at max. 25mA or max. 25V DC
- Strain Relief: - Standard straight-through (IP 68)
  - Bend protection (IP 68)
  - Trumpet Pull/Bend protection (IP 68)
- Cable: - Multi conductor, PVC, SJT
  - Multi conductor, PVC, SJT, shielded
  - Per customer specifications
- Connectors: - Per customer specifications
- IEC 601-1 certified
- Die cast aluminum pedal
- Potentiometer available upon request
- Custom colors available upon request
- Combination of different switch inserts

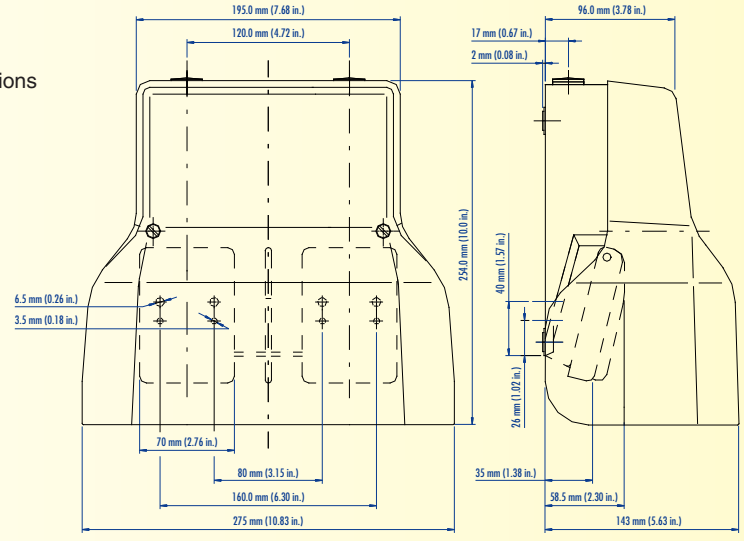
### Dimensions



* Maintained contacts available upon request

## ⚠ WARNING for General Applications

**The use of foot switches on machines, which do not have "point of operation" and "pinch point" protection can cause serious injuries to the operator!**

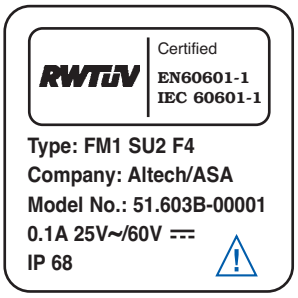
The point of operation and pinch point guarding devices should be properly installed before a foot switch is used. The foot controls should be utilized so that it is impossible for the operator's hands and fingers to remain within the point of operation during the machine cycle.

**Point of operation** - The point or area of the machine or the equipment where the work piece or material is positioned and work is being performed during any process such as forming, cutting, welding, punching, shearing, assembling, riveting, etc.

**Pinch point** - Any point at which it is possible for a portion of the body to be caught and injured between moving machine or equipment or work piece parts.

## ⚠ Additional WARNING for Medical Applications

Medical environments have high demands for safety and hygiene. The use of inadequate foot switches can cause serious injuries to the user and patient! The Altech/ASA foot switches meet the requirements of IEC 60601-1 for medical electrical equipment.



- ***Protection Level IP 68 (Immersion in water)***
- ***Limited voltage rating to 25V~ (AC)/60V ⎓ (DC)***
- ***UL/CSA, VDE approved switch insert***
- ***Installed cable with special pull/bend protection strain relief***
- ***Special durability inspection and drop test of housing***
- ***Alternative colors to differentiate this special application***

The **IEC 60601-1** certification for this special application is issued by TÜV Essen/RWTÜV. This organization is a Notified Body by the European Union and has Governmental accreditation for all types of certification plans for Medical Devices.

**Nevertheless, it is the responsibility of the user to select the suitable foot switch for his application. Altech can only make suggestions for the proper use in special applications. Otherwise the correct installation and wiring of the foot switch should comply with all Federal, State and Local safety and health regulations.**

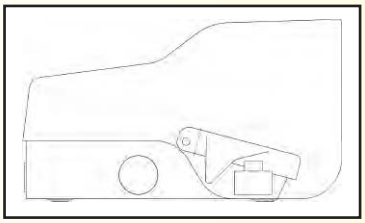
# FEATURES APPLICABLE TO THE FS SERIES

## Safety Foot Switch

To prevent accidents, Altech/ASA has included a special safety foot switch in its line. The concept is based on an extensive survey, which indicated that, in case of an accident the user depresses the foot pedal even harder instead of releasing the pedal. This special safety foot switch is designed to compensate for this emergency situation, by breaking electrical contact when the pedal is completely depressed. It has modified, two stage momentary contact types, with a manual reset button.

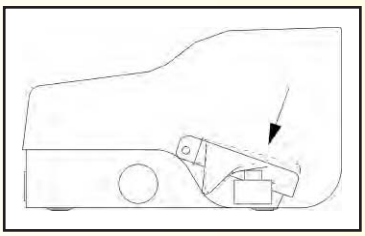
## Safety Foot Switch Functions

**"OFF"**



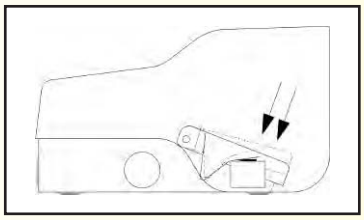
**Step 1:** The pedal is not depressed. The contacts are open. The machine is turned off.

**"ON"**



**Step 2:** To start the machine, the pedal must be depressed until the "pressure point", where resistance is noticeable.

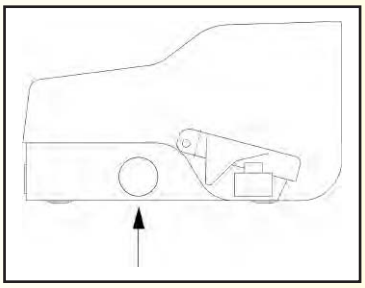
**"EMERGENCY - OFF"**



**Step 3:** In an emergency, if the pedal is depressed beyond the pressure point, the machine will stop. Beyond the pressure point, the contacts are locked in the "OFF" - Position. The machine cannot operate at this time.

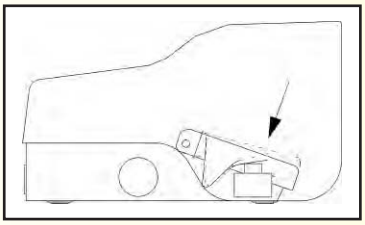
Note: The machine can also be stopped, by releasing the pedal instead of depressing harder. (Back to Step 1)

**"RESET"**



**Step 4:** The push button on the side of the foot switch must be pushed by hand to enable the foot switch to start the machine function again.

**"ON"**



**Step 5:** Return to condition described in Step 2.

**The safety foot switch is available in the one and two pedal heavy duty with guard versions.**
**See pages 20 and 22 for more information on the FS1 ... U and FS2 ... U Series.**

# FEATURES APPLICABLE TO THE FL AND FS SERIES *

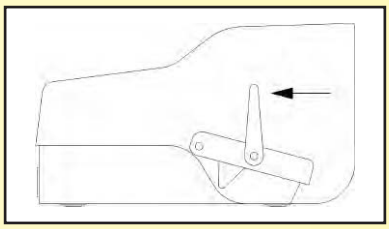
## Foot Guards

Foot Guards are used to prevent accidentally actuating the foot switch by falling objects such as parts and tools.

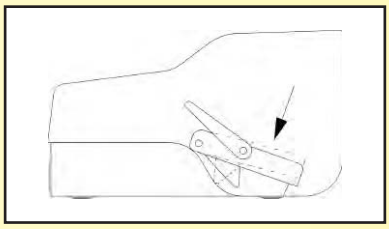
Most European accident prevention standards such as the German Berufsgenossenschaft (BG) (similar function to OSHA) require foot guards for many applications. In addition there is a special space under the guard, where certain devices such as, emergency off switches and contactors can be mounted.

## Anti-Trip Lever Mechanism

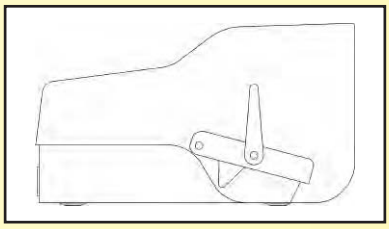
(Prevents the pedal from accidental actuation)



**Step 1**: To depress the pedal, the Anti-Trip lever must be pushed forward. Otherwise, a spring loaded mechanism holds the lever in position.



**Step 2**: After the lever is pushed forward, the pedal can be easily depressed.



**Step 3**: Immediately after releasing the pedal, the spring loaded mechanism brings the lever back to its starting position.

**The maximum human safety and machine protection is provided by the combination of Anti-Trip lever mechanism and Foot Guards!**

* The two stage function is applicable to all foot switches.

## Foot Rests

Ergonomically designed foot rests help reduce fatigue that may set in after operating a foot switch for an extended period of time.

Foot rests are available on the one pedal versions of the FL and FS series, with or without a guard.

## Potentiometers

Foot switches can be ordered with built-in potentiometers to change speed, etc. Typical applications include:

- **Coil Winding Machines**
- **Machine Tools**
- **Medical Facilities**
- **Pumps**
- **Sewing Machines**
- **Welding Machines**

Function: In the “OFF” position the potentiometer is at “zero”. A microswitch connected in series to the potentiometer will only provide a voltage to the potentiometer once the foot switch has been activated.

The standard resistance of the potentiometer foot switch is 10k Ohm which provides a proportional signal depending on the position of the foot pedal (Resistances of 100 Ohm to 20k Ohm are also available). Potentiometers are available for the FL and FS Series.

## Two Stage Function

The following describes the mechanical operation of two momentary contact types:

**Stage 1**: To activate the first momentary contact, depress the pedal until resistance is noticeable.

**Stage 2**: To activate the second momentary contact, press the pedal beyond the resistance point.

Both functions are now turned on. By releasing the pedal, the functions will be turned off in reversed direction.

# SWITCH SPECIFICATIONS

## Contact Types

**• Momentary**
To start the function, press the pedal. Release the pedal to stop. (Press to start - Release to stop)

**• Maintained**
To start the function, press the pedal. After releasing the pedal, the contacts remain in the "ON" position unless the user presses and releases the pedal again.

## Switch Types

**• Slow make-break**
With double throw contacts where the moving contact, in transferring, interrupts one circuit before establishing the other.

**• Snap Action**
The action of moving contact members that transfer from one position to another at a speed which is essentially independent of actuator speed.

## Contact Configuration

| Foot Switch | Circuit Function | Contact Symbol | Other common expressions used | Description |
|---|---|---|---|---|
| **FM Series & FK Series** | SPDT-SB (Single Pole, Double Throw, Single Break) |   | • Form C<br>• Break, Make<br>• Changeover | With a SPDT-SB contact, one circuit opens at almost the same time another circuit closes. The contact can also be wired as a n.o. (contacts C and 2) or a n.c. (contacts C and 1). |
| | DPDT-SB (Double Pole, Double Throw, Single Break) |   | • Form CC<br>• 2x Break, Make<br>• 2x Changeover | Twice the function of a SPDT-SB. |
| | 2x SPDT-SB (2x Single Pole, Double Throw, Single Break) |   | 1. Stage SPDT-SB*<br>2. Stage SPDT-SB*<br>(* Form C; Break, Make; Changeover) | 1 SPDT-SB contact before the pressure point and 1 SPDT-SB contact beyond the pressure point. |
| **FL Series & FS Series** | SPDT-DB (Single Pole, Double Throw, Double Break) |   | • Form Z<br>• 1 n.o. / 1 n.c. | Contacts 1 and 2 are the 1 n.c.<br>Contacts 3 and 4 are the 1 n.o. |
| | DPDT-DB (Double Pole, Double Throw, Double Break) |   | • Form ZZ<br>• 2 n.o. / 2 n.c. | Contacts 1, 2 and 5, 6 are 2 n.c.<br>Contacts 3, 4 and 7, 8 are 2 n.o. |
| | 2x SPDT-DB |   | 1. Stage SPDT-DB*<br>2. Stage SPDT-DB*<br>(* Form Z)<br>• 2x 1 n.o. / 1 n.c. | Contacts 1 and 2 are n.c., contacts 3 and 4 are n.o., before the pressure point.<br>Contacts 5 and 6 are n.c., contacts 7 and 8 are n.o., beyond the pressure point. |

# OPTIONS

## IEC 60601-1

International Standard for medical electrical equipment. General requirements for safety.

RWTÜV Certified EN 60601-1 IEC 60601-1

Medical environments have high demands on safety and hygiene. The certification for this special application is issued by TÜV Essen/RWTÜV. This organization is a Notified Body by the European Union and has Governmental accreditation for all types of certification plans for Medical Devices. The Altech/ASA foot switches meet the requirements of IEC 60601-1 for medical electrical equipment.

- **Protection Level IP 68**
- **Limited voltage rating to 25V~ (AC)/60V⎓ (DC)**
- **UL/CSA, VDE approved switch insert**
- **Installed cable with special pull/bend protection strain relief**
- **Special durability inspection and drop test of housing**
- **Alternative colors to differentiate this special application**

The IEC 60601-1 certified foot switches are available in the FM, FL, and FS series.

## Explosion Protected - EX

In many industries and environments explosion protected foot switches are required.

Applications include, but are not limited to:

- **Petrochemical Industries**
- **Chemical Industries**
- **Plastic Molding Machines**
- **Printing Machinery**
- **Converting Machines**
- **Wood Processing Machinery**
- **Food Processing Industries**

Altech/ASA foot switches use the principle of flame proof enclosures. Possible explosions are contained inside the foot switch and cannot cause any damage outside.

Altech/ASA Explosion Protected foot switches use special switch inserts which meet the EEX, d, IIC and T6 classifications and can be used in zone 1 and 2 applications to DIN VDE 0165.

EEX = Ex protected to European EN 50014
d = Flameproof enclosure
IIC = Explosion group IIC
T6 = Temperature class 6

Due to the increased safety requirements Altech/ASA EX - Foot switches are always delivered complete with a 3 meter (10 ft.) cable and an EX approved strain relief.

Explosion protected foot switches are only available in the FS Series.

## Cable Chart

| Foot Switch | AWG Size/ No. of Cond. | Voltage Rating/V | Current Carrying Capacity/Amp. | Overall Diameter | | Material | Applications |
|---|---|---|---|---|---|---|---|
| | | | | Inches | mm | | |
| FM Series, FK Series, PCFS-3M Series | 20/2 | 300 | 8 | .200 - .265 | 5.08 - 6.73 | SJT - Plastic<br>SJO - Neoprene<br>SJTO - Plastic<br>SJOOW - Plastic | Light and medium duty service such as small tools, small motors, sound, office, and medical equipment, etc. |
| | 20/3 | 300 | 8 | .210 - .292 | 5.33 - 7.42 | | |
| | 20/4 | 300 | 8 | .240 - .322 | 6.10 - 8.18 | | |
| | 20/6 | 300 | 7 | .260 - .381 | 6.60 - 9.68 | | |
| | 20/9 | 300 | 7 | .317 - .439 | 8.05 - 11.15 | | |
| | 20/12 | 300 | 7 | .338 - .478 | 8.59 - 12.14 | | |
| | 20/20 | 300 | 5 | .430 - .561 | 10.92 - 14.25 | | |
| | 18/2 | 300 | 10 | .230 - .301 | 5.84 - 7.65 | | |
| | 18/3 | 300 | 10 | .242 - .318 | 6.15 - 8.08 | | |
| | 18/4 | 300 | 7 | .254 - .330 | 6.45 - 8.38 | | |
| FL Series & FS Series | 18/2 | 600 | 10 | .335 - .375 | 8.51 - 9.53 | ST - Plastic<br>SO - Neoprene<br>STO - Plastic<br>SJOOW - Plastic | Heavy duty service such as heavy tools, industrial equipment controls, industrial machinery, medical equipment, etc. |
| | 18/3 | 600 | 10 | .360 - .390 | 9.14 - 9.91 | | |
| | 18/4 | 600 | 7 | .385 - .420 | 9.78 - 10.67 | | |
| | 16/2 | 600 | 13 | .340 - .400 | 8.64 - 10.16 | | |
| | 16/3 | 600 | 13 | .355 - .420 | 9.02 - 10.67 | | |
| | 16/4 | 600 | 10 | .390 - .450 | 9.91 - 11.43 | | |
| This cable chart is only to be used as a guide. If the conditions of use vary (i.e., high temperature, hazardous environments, etc.) the normal cable should not be used. Please contact Altech for special applications. | | | | | | | Note: SJO, SJTO, SO, STO, and SJOOW are resistant against oil, grease, and acid. |

*Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.*

*С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров*

*Мы предлагаем:*

- *Конкурентоспособные цены и скидки постоянным клиентам.*
- *Специальные условия для постоянных клиентов.*
- *Подбор аналогов.*
- *Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.*

- *Приемлемые сроки поставки, возможна ускоренная поставка.*
- *Доставку товара в любую точку России и стран СНГ.*
- *Комплексную поставку.*
- *Работу по проектам и поставку образцов.*
- *Формирование склада под заказчика.*

- *Сертификаты соответствия на поставляемую продукцию (по желанию клиента).*
- *Тестирование поставляемой продукции.*
- *Поставку компонентов, требующих военную и космическую приемку.*
- *Входной контроль качества.*
- *Наличие сертификата ISO.*

*В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.*

*Конструкторский отдел помогает осуществить:*

- *Регистрацию проекта у производителя компонентов.*
- *Техническую поддержку проекта.*
- *Защиту от снятия компонента с производства.*
- *Оценку стоимости проекта по компонентам.*
- *Изготовление тестовой платы монтаж и пусконаладочные работы.*
